 Note that letters T and L and the numeral 0 are all single Dashes. L is made

DOT 'N' DASH SENDING & RECEIVING TELEGRAPH SET

Complete with
MORSE CODE
 and Directions for Operating

DIRECTIONS — TO OPERATE ONE SET

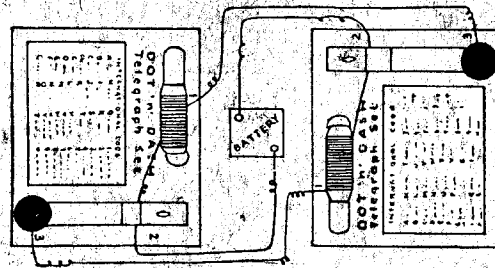

1. Scrape all insulation 1 inch from ends of Wires No. 1 and 2.
2. Connect Wires No. 1 and No. 3 to battery as shown on diagram above.

HOW TO SEND THE MORSE CODE

The Morse Code consists of combinations of Dots and Dashes. A Dot is made by pressing Key down and immediately releasing it. A Dash is made by holding Key down a fraction longer than in making a dot.

Continued on Back of Box

BOYS! Have a private telegraph system of your own!
 Buy two "DOT 'N' DASH" sets, hook them up as
 shown on bottom of box and you will have lots of fun
 sending messages to your friends.

DIRECTIONS — TO OPERATE TWO SETS

1. Add additional wire to Wires No. 1, 2 and 3 of one set to cover the distance you want the two sets to be.
2. Connect Wire No. 1 of one set to Wire No. 3 of other, and Wire No. 3 of first set to Wire No. 1 of the second set. Then connect No. 2 Wires to Battery as shown.

JOHNSON SMITH & CO. Racine, Wis.

IMPORTANT DIRECTIONS

TO CONNECT No. 2 WIRE:

1. Scrape all insulation from the wire on the Sounder nearest the Key.
2. Pull it underneath the Key, as far up as it will go to the rivet fastening the Key to the Base, as shown on diagram on front of box. Make sure there is a good contact or the set will not work.
3. When operating one set turn the end of Wire No. 2 under the Base making sure it does not touch No. 3 Wire.

TO ADJUST THE SOUNDER:

1. The right end of the Sounder should be on line with the head of brass rivet underneath. If below the head it sometimes causes Clapper to "stick." Adjust this by pulling up a bit on Sounder. If above, press down until on line with head of rivet.
